

Rolling 12-month span

												calendar month	current benefit month	
	10/08	11/08	12/08	01/09	02/09	03/09	04/09	05/09	06/09	07/09	08/09	09/09	10/09	11/09
JBS hrs entered	20	20	20	20	20	20	20	20	20	20	20	20	20	20
	240													
		240												
			240											
												attempt to reconcile more than 20 is not allowed	attempt to reconcile or negotiate more than 20 is not allowed	attempt to reconcile or negotiate more than 20 is not allowed
On EMPL, JBS component is entered for 20 total hours for weeks one, two and four for benefit month 09/09 (12 month span is 10/08 - 09/09). This would bring the total hours for the previous twelve months to 240 hours (10/08 - 09/09)														
On EMPL, JBS component is entered for 20 total hours for weeks one, two and three for benefit month 10/09. The system correctly allows entry of the JBS component because the hours from 10/08 are no longer being counted (12 month span is now from 11/08 - 10/09). This would bring the total hours for the previous twelve months to 240 hours (11/08 - 10/09).														
On EMPL, JBS component is entered for 20 total hours for weeks one, two, three and four for benefit month 11/09. The system correctly allows entry of the JBS component because the hours from 11/08 are no longer being counted (12 month span is now 12/08 - 11/09). This would bring the total hours for the previous twelve months to 240 hours (12/08 - 11/09).														
On EMPL, if an attempt is then made to increase the number of hours in 09/09, the system correctly does not allow it because it would bring the total hours to greater than 240 in the twelve month period (from 12/08 through 11/09) and displays the error message, TM903257 JBS HRS EXCEED 240 IN A 12 MONTH SPAN-REDUCE CURRENT OR FUTURE JBS HRS.														
On EMPL, the same error would be displayed if an attempt is made to reconcile hours for 09/09 for more hours than were negotiated for the JBS component. This would cause the total hours, including hours that were negotiated for 10/09 and 11/09, to exceed the 240 limit.
